RECORDED

A.D. 1871, 10th AUGUST. N° 2101.

Brewing.

(This Invention received Provisional Protection only.)

PROVISIONAL SPECIFICATION left by Colin Paget Matthews at the Office of the Commissioners of Patents, with his Petition, on the 10th August 1871.

I, COLIN PAGET MATTHEWS, of Grantham, in the County of Lincoln,
5 Brewer, do hereby declare the nature of the said Invention for "IM-
PROVEMENTS IN BREWING BEER AND OTHER MALT LIQUORS," to be as follows:—

The Invention has for its object improvements in brewing beer and other malt liquors.

For this purpose I take powdered charcoal in the proportion of from
10 about ten to twelve pounds thereof to one quarter of malt and boil it for
about half an hour in the water required for mashing and sparging. I
then strain or filter such water, so as to separate the solid particles of
charcoal therefrom, and employ the water as heretofore in the mashing
and sparging processes.

15 The charcoal I prefer to use for the above process is that prepared
from willow.

Matthews' Improvements in Brewing Beer and other Malt Liquors.

By the use of charcoal as herein described the keeping properties of beer and other malt liquors are much increased, whilst such liquors are rendered of a less bilious tendency, thereby enabling many to drink them who were unable to do so as formerly prepared.
